DETAILED ACTION

Drawings

1. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1- 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Kondo et al., “Surfin’ the World Wide Web with Japanese”.

As per claim 1, Kondo et al disclose a method for recognizing voice commands for manipulating data on the Internet, (see Title and Abstract), comprising the steps of:

providing data on a website on the Internet, (see page 1153, Fig. 1, “Internet”);
receiving voice signals form a user accessing the website, (see page 1153, Fig. 1, “Speech, Links, Commands, Queries”);
interpreting the voice signals of the user for determining navigational command, (see page 1153, Fig. 1, “Speech Recognizer”, “Interpretation”, “Speakable Commands”);
outputting selected data of the website based on the navigational commands, (see Fig. 1, “WWW browser”).

Art Unit: 2641

As per claim 2, Kondo et al. disclose a method wherein the data includes a voice-activated application, the navigation commands controlling execution of the application, (see Abstract).

As per claim 3, Kondo et al. disclose a method wherein the user accesses the web site from at least one of a computer and a telephone, (This features are inherent to a method/system for accessing the Internet).

As per claim 4, Kondo et al. disclose a method comprising determining a language from the voice signals, (see page 1152, section 3.1).

As per claim 5, Kondo et al. disclose a method further comprising utilizing artificial intelligence to interact with the user, (see Fig. 1, "ruled heuristics").

As per claim 6, Kondo et al. disclose a method wherein the selected data includes voice signals and is outputted to a telephone, (see page 1153, Fig. 1 and Abstract).

As per claims 7-12, 13-18, Claims 7-12, 13-18 are similar in scope and content to claims 1-6 rejected above, therefore claims 7-12, 13-18 are rejected under the same rationale.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hemphill et al., "Speech-Aware Multimedia"
